

Halti®

The BRIG® safety lead

The next generation in lead safety, featuring the new ultra-strong BRIG® clip for secure walks

    @companyofanimals

The BRIG® safety lead

The Halti BRIG® Safety Lead is designed for large, powerful dogs, prioritising safety, comfort, and control on every walk. The new BRIG® clip withstands force of 340kg and is 1.5 x stronger than a standard trigger clip. Combined with 2 grab handles for close control, this is the ultimate lead for strong dogs. Available in 4 traffic light colors to match your dog's style and temperament.

Features of the BRIG® safety lead

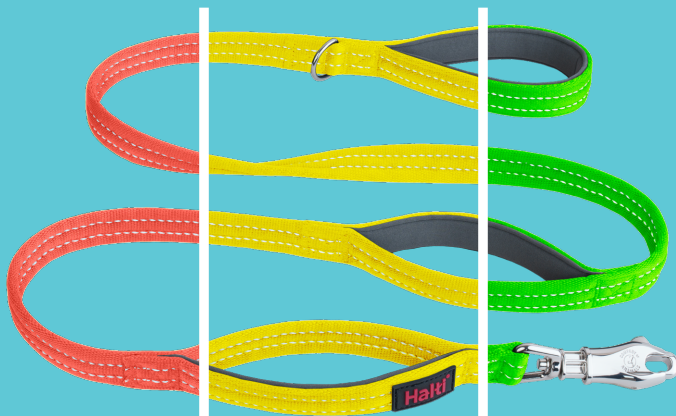

Designed for Control. Built for Comfort.

For added convenience, the Halti BRIG® Safety Lead includes a D-ring at the base of the handle, perfect for wearing the lead cross-body when your dog is off-lead or for attaching poop bags. Both handles are padded with soft neoprene for all-day walking comfort, while two strategically placed close control handles allow for instant restraint when needed – ideal in busy areas or around distractions.

Traffic Light Colors

Our color-coded lead system is a simple yet effective way to communicate your dog's temperament.

NEW

Introducing the BRIG[®] clip

The next generation in lead safety.

Can withstand
up to 340kg

Compatible with
a variety of
harnesses
and collars

Anti-tangle
mechanism

1.5x stronger
than a
traditional clip

The BRIG[®] clip is also ideal for dogs living near sand or dirt. Its enclosed mechanism is designed to prevent debris from getting in, making it safer and more reliable than standard trigger clips, which can jam or accidentally release when clogged with grit.
